

# How many power base stations are there in China

## Overview

---

There are 124 Power stations in China as of November 14, 2024; which is an 0.00% increase from 2023. Of these locations, 122 Power stations which is 98.39% of all Power stations in China are single-owner operations, while the remaining 2 which is 1.61% are part of.

There are 124 Power stations in China as of November 14, 2024; which is an 0.00% increase from 2023. Of these locations, 122 Power stations which is 98.39% of all Power stations in China are single-owner operations, while the remaining 2 which is 1.61% are part of.

The following page lists some power stations in mainland China, sorted by energy source and location.

There are 124 Power stations in China as of November 14, 2024; which is an 0.00% increase from 2023. Of these locations, 122 Power stations which is 98.39% of all Power stations in China are single-owner operations, while the remaining 2 which is 1.61% are part of larger brands. The top three.

China has 4,227 utility-scale power plants in operation, with a total capacity of 1411679.8 MW.

China possesses the world's largest installed electricity generation capacity, reaching 3,720 gigawatts (GW) as of September 2025, driven by rapid industrialization and a strategic shift toward renewables while maintaining a significant reliance on coal. [1] [2] The list of power stations in China.

Explore power plants in China: interactive map, capacity by fuel, top stations, and key country stats.

China boasts a significant number of energy storage power stations, reportedly exceeding 50,000 MW in installed capacity. This includes various technologies such as pumped hydro storage, lithium-ion batteries, and other emerging storage solutions. 2. The motivation behind this expansive development. Which power stations are in mainland China?

The following page lists some power stations in mainland China, sorted by energy

source and location. The Three Gorges Dam is the world's largest electricity-generating plant of any kind. Total capacity will be 3 GW in 3 phases. Phase I completed in October 2011, followed by Phase II and III. 60 MW phase IV under construction.

How many power plants are there in China?

China has 4,227 utility-scale power plants in operation, with a total capacity of 1411679.8 MW. Data and information about power plants in China plotted on an interactive map.

How many service stations are there in China?

The 22 stations are distributed in the entire east coast between Yangpu Bridge and Xupu Bridge. There's a service station every kilometer, which is aimed to provide citizens with rest spaces and public toilets.

How many 5G base stations does China have?

China continues to have significantly more 5G base stations than the U.S., surpassing 1.3 million stations by the end of 2021. Get notified via email when this statistic is updated.
