A UPS system provides battery backup power to keep your devices running during short outages and provides enough runtime to properly shut down electronics during extended outages. Safeguard your costly computer equipment from potential damage that can be caused by power spikes and surges. Keep your.

An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it

does not need to power up in order to start generating.

The cost of implementing a UPS system can vary significantly depending on various factors. Understanding these factors is essential for businesses to make informed decisions: Capacity and Scalability: The size and capacity of the UPS unit directly impact its cost. Larger units capable of supporting.
