

# How much is the subsidy for Tonga s energy storage power station

## Overview

---

The Asian Development Bank (ADB) has agreed to part-fund a US\$53.2 million undertaking to power Tonga with renewable energy, including the installation of 22.2MWh of energy storage.

The Asian Development Bank (ADB) has agreed to part-fund a US\$53.2 million undertaking to power Tonga with renewable energy, including the installation of 22.2MWh of energy storage.

The Government of Tonga continues the electricity price subsidy to the March 2023 quarter since the current price of electricity still appears to remain much higher than the usual monthly bill. The government subsidy will cover both categories: (i) residential customers whose units of consumption.

The Renewable Energy Project will help Tonga rapidly move from its heavy dependence on imported fossil fuels for power generation (about 90%) to using clean and renewable energy resources that are low carbon and climate resilient. A GCF grant of \$29.9 million, combined with a \$12.2 million grant.

From 1 October 2025, Tonga households will face a power tariff rise to 92.16 seniti per kWh, driven by rising diesel costs and a retained government subsidy. The Competent Authority has approved a \$0.14 seniti per litre diesel increase (7.10 %) for the June–September 2025 period. That pushes.

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage). In addition to large-scale energy storage projects, Tonga is exploring the potential of distributed energy.

(TREP) located in two separate locations. The first BESS, which is for grid stabilization technology developed by the Akuo Group. g to Tonga's 50% Re the Prime Minister Hon. Hu''akavameiliku. The mponent is leading by Tonga Power Limited. A component to install solar PV facility and Battery .

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is

designed to transfer the electrical load in order to.

## How much is the subsidy for Tonga s energy storage power station

### Tonga , ADB and the GCF

The project has been designed to help move Tonga from its current energy pathway that is almost entirely (about 90%) dependent on imported fossil fuels for power generation to a pathway ...
