How do I connect my battery to my home WiFi network?

This article will help you connect your battery to your WiFi. It will also help you troubleshoot internet connectivity issues. How do I test my Base battery?

This article explains how you can simulate a power outage and test your Base battery.

There may be a point where you will need to transfer your system and service to a new or different Base Station, such as replacing a faulty Base Station or transferring to a new Base Station when you move. Please ensure that you follow each step in the order they are presented, including resetting.

According to rightchannelradios.com, a well-designed base station can achieve communication ranges of 15-25 miles regularly, with skilled operators reaching even further during optimal conditions. This dramatic improvement over mobile installations comes from higher antenna placement, better.

Get a LiFePO4 battery for the base station to keep that up and running for a while. Or put solar on it and let it self charge to keep it up and running longer.
