

Huawei solar panel parameters and specifications

Overview

The Huawei SUN2000-15KTL-M2 is a solar panel designed for outdoor power supply. With a maximum input voltage of 1080 V, it is capable of delivering an output power of 15000 W. The output frequency of the device is 50/60 Hz, allowing for compatibility with various electrical systems.

The Huawei SUN2000-15KTL-M2 is a solar panel designed for outdoor power supply. With a maximum input voltage of 1080 V, it is capable of delivering an output power of 15000 W. The output frequency of the device is 50/60 Hz, allowing for compatibility with various electrical systems.

*1.The inverter max input PV power is 10,000 Wp when long strings are designed and fully connected with optimizers. Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment. The actual values may vary with products, software versions, usage.

*1 Available in 2020 Q3. *2 Inverter max input PV power is 10,000 Wp when long strings are designed and fully connected with SUN2000-450W-P power optimizers. *3 The maximum input voltage and operating voltage upper limit will be reduced to 495 V when inverter connects and works with LG battery. *5.

Market Leadership with Proven Technology: Huawei maintains its position as the world's #1 solar inverter manufacturer for six consecutive years, commanding 29% of the global market through superior AI-powered optimization, 99% peak efficiency, and extensive R&D investment representing 54.1% of.

When choosing a solar inverter Huawei for your residential or commercial photovoltaic system, prioritize efficiency, reliability, and smart grid integration. The best option often depends on your energy needs, roof layout, and future expansion plans. For most homeowners seeking high performance and.

Neimenggu, China Huawei has deployed nearly 20,000 green base sites powered by wind and solar energy, realized 80% reduction in fuel consumption, to make a cleaner grass and sky. June 2011, Svalbard, Norway After the test of -50°C in the Arctic, Huawei launched the northernmost LTE site for.

Note a: The maximum input voltage is the upper threshold of the DC voltage. If the

input voltage exceeds the threshold, the solar inverter may be damaged. Note b: If the input voltage is beyond the operating voltage range, the solar inverter cannot work properly. Note c: PV strings connecting to.
