

Hybrid Government Procurement of Photovoltaic Energy Storage Containers for Schools

Overview

Established in 2014, SPURR's Renewable Energy Aggregated Procurement (REAP) Program is an innovative aggregated solar and energy storage procurement program that leverages the collective purchasing power of SPURR's large membership to secure competitive, transparent, pre-negotiated.

Established in 2014, SPURR's Renewable Energy Aggregated Procurement (REAP) Program is an innovative aggregated solar and energy storage procurement program that leverages the collective purchasing power of SPURR's large membership to secure competitive, transparent, pre-negotiated.

Are you looking to streamline your solar and energy storage procurement process?

Established in 2014, SPURR's Renewable Energy Aggregated Procurement (REAP) Program is an innovative aggregated solar and energy storage procurement program that leverages the collective purchasing power of SPURR's.

Via seven loan programs & project categories supporting both innovative and commercial technologies. SEFI projects support deployment of a qualifying clean energy technology and receive meaningful financial support or credit enhancements from an entity within a state agency or financing authority.

A Request for Proposal (RFP) is a formal bid document to ask vendors to provide proposals for desired projects, as required by many public agencies (federal, state, local). A solar RFP outlines the photovoltaic (PV) product or service requirements, the contract terms, and bidding process. RFPs are.

Historically, state and local governmental agencies have employed one of two models to deploy solar photovoltaic (PV) projects: (1) self-ownership (financed through a variety of means) or (2) third-party ownership through a power purchase agreement (PPA). Morris County, New Jersey, administrators.

The U.S. Department of Energy estimates that K-12 schools spend over \$6 billion annually on energy, a cost that is often worsened by aging, inefficient buildings. To address this cost, many schools have turned to solar energy as a way to modernize their facilities. Today, nearly 1 in 10 schools use.

Federal funds and incentives are making it even more affordable for schools to go solar to meet their energy needs while also gaining significant cost savings, STEM learning opportunities, and technology for workforce training. Today, at least one in nine students in the country attend a K-12.
