

Initial working voltage of solar inverter

Initial working voltage of solar inverter

[Understanding inverter startup voltage.](#)

I would say 90v for EACH MPPT input, separately. So if your inverter has only one MPPT input, that's 90v. If your inverter has two or more MPPT inputs, that's 90v for each one. ...

The starting voltage of the inverter is higher than the minimum voltage

When the inverter starts, the modules are in a working state and the voltage will decrease. In order to prevent the inverter from restarting repeatedly, the starting voltage of the inverter is ...
