

Iraq New Energy solar Site

Overview

Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that has led to widespread blackouts.

Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that has led to widespread blackouts.

This aerial photo shows panels at a newly opened industrial-scale solar power plant in Karbala, Iraq, on September 17, 2025 [Anmar Khalil/AP] Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that.

Iraq is developing a solar power project in the central desert region as part of efforts to ease chronic electricity shortages worsened by a decline in Iranian gas imports. The new plant will generate 300 megawatts of power from half a million solar panels, of which nearly 40,000 have been.

Iraq is set to open the country's first industrial-scale solar plant Sunday in a vast expanse of desert in Karbala province, southwest of Baghdad. It's part of a new push by the government to expand renewable energy production in a country that is frequently beset by electricity crises despite.

Iraq has launched a new solar power project as part of an intensified drive to tackle a post-war electricity shortage that has been worsened by lower Iranian gas supplies. The new plant will generate 300 megawatts (MW) and involves the installation of half a million solar panels. The project is.

The Iraqi Prime Minister has laid the foundation stone for the Shams Al-Basra solar power station, a landmark renewable energy project in Basra with a total generation capacity of 1,000 megawatts. Speaking at the inauguration, Mohammed Shia Al-Sudani highlighted the strategic importance of the.

Iraq is finally proceeding with the country's first big solar power plant. The Baghdad government has stepped up the effort to adopt a more environmentally sustainable energy policy that includes combining renewable energy additions and

reducing gas flaring from oil operations. French energy major.
