

Laos Southern Power Grid Energy Storage

Overview

Does Laos have a power grid?

To alleviate its debt, Laos has given the joint-venture Électricité du Laos Transmission Company Ltd., which the Chinese state-owned China Southern Power Grid Company owns a majority share, a 25-year concession agreement giving it the rights to build and manage its power grid, including electricity exports rights.

Does Lao PDR supply electricity to neighbouring countries?

Thus, electricity generated in Lao PDR can be supplied domestically as well as exported to neighbouring countries. The power transmission system of Lao PDR is divided into two types of transmission lines - one for domestic supply and one for export, where power plants are directly connected to neighbouring countries.

Does Laos have a green energy plan?

The Laos government has an investment plan that will aid national development and contribute to a broader green energy revolution in Southeast Asia. High debt levels and the promise of ecological destruction along the Mekong has raised concerns, and may prove prohibitive without careful engagement and regional backing.

Does Lao PDR have a coal-fired power plant?

Lao PDR has a long journey ahead in decarbonising its whole energy system; it has the current 1,878-MW Hongsa coal-fired power plant as well as additional already-committed coal-fired power plants in the southern part of the country.
