

# Large-Scale Energy Storage Batteries in North America

## Overview

---

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs .

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs .

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs, and small-scale battery storage.

In 2025, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added in 2024. These systems play a crucial role in balancing supply and demand, enhancing grid stability, and supporting the integration of renewable energy. The largest upcoming BESS.

As the U.S. accelerates its transition toward a cleaner, more resilient energy grid, utility-scale battery energy storage systems (BESS) are emerging as a critical enabler of this transformation. These large-scale storage installations—often deployed by utility companies, independent power.

North America Battery Energy Storage Systems Market is witnessing rapid expansion driven by growing renewable energy penetration, grid modernization, and supportive regulatory frameworks for clean energy adoption. The rise in intermittent solar and wind power generation is fueling demand for.

vesting Billions into New or Expanded Grid Battery Manufacturing facilities across the United States, from the Rust Belt to the Sun Belt. Th across the United States, in Utah, over 1,25 construction and full-time jobs. Tesla American batteries, creating 750 jobs. Form Tennessee, Arizona, and.

Members of the US energy industry has committed to investing \$100 billion over

the next five years to build and buy American-made batteries for large, utility-scale deployments of battery energy storage systems (BESS). Executives from the American Clean Power Association (ACP) and several utility.

## Large-Scale Energy Storage Batteries in North America

### Utility-Scale Battery Storage in the U.S.: Market Outlook, Drivers, ...

In this article, we'll explore the current state of the utility-scale battery storage market in the United States, highlight the forces driving its growth, discuss key application ...
