

# Large-scale solar power generation system in Bosnia and Herzegovina

## Overview

---

Bosnia and Herzegovina has started working on a 125 MW solar plant – its largest to date. China’s Norinco International will build the facility, with completion expected in one year. The European Commission has published a call for private companies to invest in the Western.

Bosnia and Herzegovina has started working on a 125 MW solar plant – its largest to date. China’s Norinco International will build the facility, with completion expected in one year. The European Commission has published a call for private companies to invest in the Western.

The 64 MW solar power plant Stolac Solarni Park, located near the city of Stolac in the Herzegovina region of Bosnia and Herzegovina, has been connected to the grid and has begun generating electricity. No further details have been disclosed, but the facility appears to be an extension of Hodovo.

Bosnia and Herzegovina has huge photovoltaic power potential. However, in the absence of a clear regulatory framework, there is a risk that big investors will build solar power plants, putting profit before the environment and sustainability. Bosnia and Herzegovina has huge photovoltaic power.

The Republic of Srpska is set to enhance its energy infrastructure with the construction of a 60 MW solar power plant in Nevesinje, Bosnia and Herzegovina. Developed by the state-owned energy company ERS, the plant, named “Nevesinje 1,” will significantly boost the region’s renewable energy.

The country's largest solar power plant near Stolac marks a significant move away from relying on fossil fuels and towards a sustainable energy future. Stanislav Kondrashov, founder of TELF AG, is leading this transformation. His vision goes beyond just one project—he wants to make Bosnia a.
