

# London Mobile Energy Storage Container 15MWh

## Overview

---

Which energy storage projects have been sold to Foresight Energy Infrastructure Partners?

In May last year, it sold two battery energy storage system (BESS) projects in southern England to Foresight Energy Infrastructure Partners: Sundon BESS, a 49.5MW project north of London that will connect with National Grid's Energy Park initiative; and Warley BESS, a 57MW project in Essex. Both sites have grid connection dates in 2024.

What is a battery energy storage container?

A well-structured battery energy storage container optimizes internal airflow, reduces cable loss, and ensures better thermal control. For example, two 40ft BESS containers with the same capacity can perform very differently depending on their internal configuration.

Why is mobile energy storage a stranded asset?

Stationary storage lacks flexibility, suffers from low utilization and from the risk of becoming a stranded asset. Power Edison addressed these issues by developing mobile energy storage platforms: TerraCharge™ and AquaCharge™ for mobile land-based and water-based mobile energy storage respectively.

How do I choose a Bess containerized battery energy storage system?

These containerized battery energy storage systems are widely used in commercial, industrial, and utility-scale applications. But one of the most important factors in choosing the right solution is understanding BESS container size — and how it impacts performance, cost, and scalability.

## London Mobile Energy Storage Container 15MWh

### [Mobile Energy Storage , Power Edison](#)

Power Edison mobile systems are designed - from the ground up - to be modular, robust, reliable, flexible and cost-effective electrical capacity ...

[Request Quote](#)

### [Megawatt-Hour Containerized Energy Storage System](#)

Preassembled in 20 and 40 ft containers, ensuring effortless transportation and deployment. Retrieval of abandoned wind and solar energy, improving power forecasting accuracy, ...
