

Long-life mobile energy storage container for highways in India

Overview

India is launching a US\$ 68.64 million pilot to test green hydrogen fuel infrastructure on 10 highways, aiming to support long-haul transport and advance its net-zero 2070 and Green Hydrogen Mission goals.

India is launching a US\$ 68.64 million pilot to test green hydrogen fuel infrastructure on 10 highways, aiming to support long-haul transport and advance its net-zero 2070 and Green Hydrogen Mission goals.

In the spirit of the COP 30 Presidency 's call for a global mutirão - a collective effort to mobilize climate action - the Business Council for Sustainable Energy (BCSE) will lead a business delegation to COP 30 in Belém, Brazil that will bring forward credible solutions, partnerships, investments.

India is focusing on green hydrogen fuel infrastructure along national highways as the next step in its transport strategy. The Ministry of Road Transport and Highways (MoRTH) will launch a pilot project worth Rs. 600 crore (US\$ 68.64 million) on 10 selected highway stretches. This initiative aims.

India's Ministry of Road Transport and Highways (MoRTH) is taking a bold step beyond electric vehicles (EVs) by launching a ₹600 crore (₹6 billion) pilot project to establish green hydrogen fuelling infrastructure across 10 key national highway corridors. This initiative complements the existing EV.

Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030—a goal that reflects our resolve to lead globally in clean energy. Energy storage is at the core of this vision. It's the key to harnessing the full potential of renewable.

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy storage tendering activity. Tenders supported by Viability Gap Funding (VGF) demonstrate.

Dublin, March 13, 2025 (GLOBE NEWSWIRE) -- The "India Hydrogen Storage & Transport Market - A Country Level Analysis: Focus on Hydrogen Production, Storage and Distribution" report has been added to ResearchAndMarkets.com's

offering. India's hydrogen ecosystem is poised for significant expansion as.
