

Malta Solar Containerized High Voltage Customer Support

Overview

Is solar PV a viable source of RES-E in Malta?

Solar PV is the most viable source of RES-E in Malta. It is projected to contribute to 42% of Malta's RES contribution in 2030. However, also other renewable energy sources are supported in the country through tenders. Malta's target for the RES- E sector is 11% by 2030 (NECP, pg. 40-41).

What is Malta's long-duration energy storage system?

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy. Malta's long-duration energy storage solution is already being deployed. Hear directly from the voices working alongside us to advance reliable, sustainable energy solutions.

Does Malta support solar water heaters?

Malta supports an installation of solar water heaters through a subsidy scheme. The RES-T share is expected to be predominantly met by an increase in biofuel consumption. An increase in the share of electric vehicles in the road transport vehicle fleet in Malta is also projected. The share of RES-T is expected to reach 15% by 2030. (NECP, pg. 42).

What is the share of renewable heating and cooling in Malta?

The share of renewable heating and cooling is expected to reach 22.06% by 2020 and rising to 25.71% by 2030 (NECP). Malta supports an installation of solar water heaters through a subsidy scheme. The RES-T share is expected to be predominantly met by an increase in biofuel consumption.
