

Marseille solar container Car

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Can cars in containers be transported by Ocean?

Summary: When transporting cars by ocean, Cars in Containers shipping can offer some key benefits around safety, visibility, flexibility, and sustainability. In 2023, a record 24 million cars were shipped around the world. While many of these cars are transported on RORO (roll on, roll off) vessels, another option is Cars in Containers.

What is a car in containers (RORO)?

Cars in Containers is a great complementary option to RoRo which can enhance predictability and efficiency in logistics planning. With access to a deep-water port not being mandatory in case of smaller vessels, OEMs can expand access to remote locations for smaller-volume consignments.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
