

Mauritania solar container communication station inverter grid-connected solar power generation equipment

Overview

How does the piemm project work in Mauritania & Mali?

The PIEMM will boost solar energy production and provide access to electricity for more than two million people in Mauritania and Mali, while also enhancing regional integration and trade. The project is financed by a \$272 million loan from the African Development Fund, the concessional window of the AfDB, and a \$1.5 million grant from the GCF.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Who is Mauritania's AfDB?

The AfDB has been active in Mauritania for over 50 years, supporting various strategic development sectors, such as agriculture, governance, water and sanitation, energy, mining, private sector, transport, and social. Source: Zawya Motoni Olodun, with an illustrious seven years in marketing operations, stands as a beacon in the field.
