Mexico's ambitious clean energy goals and rapidly expanding renewable energy capacity (primarily solar and wind) necessitate energy storage to address intermittency and grid stability challenges. Advancements in battery technology, particularly lithium-ion batteries, are leading to significant cost.

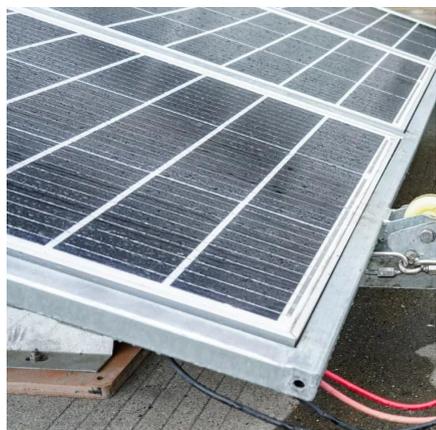

Our goal is to electrify and decarbonize transportation, with a mindset of

competitive TCO (total cost of ownership) and resource efficiency. In other words, we aim for the transition to electric vehicles to be paid for with the savings generated. Our high-efficiency motor technology originates.
