

Mobile Base Station Power Supply

Overview

What is base station Power?

Base station power refers to the output power level of base stations, which is defined by specific maximum limits (24 dBm for Local Area base stations and 20 dBm for Home base stations) and includes tolerances for deviation from declared power levels, as well as specifications for total power control dynamic range. How useful is this definition?

What size radios are compatible with the base station enclosure?

The Powerwerx MBLCOVR Mobile Radio Base Station Enclosure can accept radios that are smaller than 5.5 inches wide and 2.125 inches tall. It is compatible with most radios having 5.5 inch (140mm) mount spacing.

How do you install an enclosure on a power supply?

To install the Powerwerx MBLCOVR Mobile Radio Base Station Enclosure onto a power supply, place the enclosure (with the radio) over the power supply and slide it down, aligning the screw holes on each side to the power supply screw holes. Re-install the screws from step 9 to secure the enclosure to the power supply without tightening the screws yet.

How do I find a good power supply?

Searching for a power supply?

Choose from our ample selection of quality DC power supplies from popular, name brand manufacturers to amply handle the load! Ordered and had them tune Gmrs antenna and working great. Highly recommend Fine, very satisfied, but the real test will be the speed of delivery. Products clearly detailed and easy to find.
