Mobile DC Power Systems are typically engineered and equipped with battery chargers, batteries, AC/DC meters and controls including ancillary safety equipment in accordance with applicable IEEE Design and Installation Practices for Stationary Batteries and DC Systems as described in IEEE Std. 946.

Many hazards are associated with substation battery maintenance, especially when the DC system cannot be taken out of service without interrupting critical operations. The Black Start Mobile DC Trailer and the BlackStart Power Dock provide a seamless and reliable transfer of substation DC power to.
