New high-capacity parks for producing energy from renewable sources, accompanied by energy storage batteries, are to be built in Moldova. The auction on this purpose is set to be launched in next autumn. The auction schedule was presented by Secretary of State of the Ministry of Energy Carolina.

Moldova's Ministry of Energy is moving into the final drafting stage of its next renewable energy auction, following the close of public consultations in November. The upcoming Moldova wind and storage tender will support up to 170 MW of new onshore wind capacity combined with mandatory battery.

In 2024, renewable energy production in the Republic of Moldova doubled compared to the previous year, marking significant progress in the country's transition toward a more diversified and resilient energy infrastructure. Against this backdrop, Moldova has launched its first major green energy.

The Republic of Moldova has concluded its first-ever large-scale green energy tender, securing a record €190 million in projected investments. This landmark process marks a pivotal milestone in the country's transition towards sustainable energy and greater energy independence. In 2024, Moldova.

Moldova will launch a new auction this autumn to build high-capacity parks for producing renewable energy, coupled with battery energy storage systems (BESS). Carolina Novac, State Secretary at the Ministry of Energy, presented the auction timeline during an economic forum in Chisinau. The.

Feb 5 (Interfax) - The Moldovan Energy Ministry will accept applications from

potential investors until March 31 for constructing wind and solar parks with a total capacity of 165 MW, the ministry said. "Of this, 60 MW will be solar parks and 105 MW will be wind farms. The investments planned for.
