

Morocco exports power storage cabinets

Overview

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

How much wind power does Morocco have?

Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power. At present, Morocco has an installed capacity from wind energy of 1,650 MW, the second largest volume in Africa behind South Africa.

What is Morocco's energy strategy?

Morocco's 2009 National Energy Strategy and its Paris Agreement NDC target call for an increase of renewable energies in the electricity mix to 52 percent by 2030. This target was recently increased to 56 percent.
