

N Djamena 100W solar cell

Overview

There are three main objectives in the development of this solar farm. The first objective is to increase the grid supply of electricity in Chad. Secondly, Chad depends primarily on electricity derived from expensive -fired installations. DSPS diversifies generation to include green renewable energy. Thirdly, the project involves the improvement of the transmission network, by strengthening the transmission between N'Djamena and D'jermaya.

N'Djamena Amea Solar Power Station

The N'Djamena Amea Solar Power Station is a planned 120 MW (160,000 hp) solar power plant in

D'jermaya Solar Power Station

There are three main objectives in the development of this solar farm. The first objective is to increase the grid supply of electricity in Chad. Secondly, Chad depends primarily on electricity derived from expensive fossil fuel-fired installations. DSPS diversifies generation to include green renewable energy. Thirdly, the project involves the improvement of the transmission network, by strengthening the transmission between N'Djamena and D'jermaya.
