

Nanya solar Modules

Overview

What is Nanya's energy management system?

92% of Nanya's emissions are mainly from purchased energy. The Company implements energy conservation management through ISO 50001, and also responds to global trends by using low carbon energy. Nanya first installed solar panels in its own factories, and also

How can Nanya improve production capacity?

Energy and resource consumption per unit production capacity. Nanya has also installed an AI system and uses the assistance of smart factories to analyze data, improve the arrangement of machinery, and manage raw material inputs. Process gases used per unit die has continued to decline.

How is Nanya reducing CO2 emissions 18% in 2020 compared to 2017?

Reducing CO2 emissions 18% in 2020 compared to 2017. End-of-pipe Removal Local scrubbers are installed at the end of Nanya's process equipment, and use combustion to break the chemical bond of gas molecules, while using cleaning solution for cleaning to
