

New Energy 2KW Energy Storage Power Supply

Overview

Featuring MPPT solar charging (up to 2000W PV input), grid backup, and <10ms transfer time, it provides seamless power for residential applications. Includes LCD/APP monitoring, RS232/RS485/CAN communication, and IP21 protection.

Featuring MPPT solar charging (up to 2000W PV input), grid backup, and <10ms transfer time, it provides seamless power for residential applications. Includes LCD/APP monitoring, RS232/RS485/CAN communication, and IP21 protection.

On March 13, 2025, the leading international distributor of semiconductor components in the Asia Pacific market, United States Holdings, announced that its subsidiary Chuanting launched a 2KW 48V bidirectional AC/DC energy storage power supply solution based on Innoscience's InnoGaN INN650TA030C.

The All-in-One Energy Storage System (2kW Inverter & 2.56kWh LiFePO4 Battery) is an integrated 2000VA/2000W hybrid inverter with a built-in 2.56kWh LiFePO4 battery (25.6V 100Ah). Featuring MPPT solar charging (up to 2000W PV input), grid backup, and <10ms transfer time, it provides seamless power.

The Photonic Universe 2kW Uninterrupted Power Supply (UPS) System with 2.4kWh energy storage is. The Photonic Universe 2kW Uninterrupted Power Supply (UPS) System with 2.4kWh energy storage is a dependable backup power solution designed for mains-powered, off-grid, solar, and portable energy.

PWRcell 2 is designed to maximize energy savings and bring you peace of mind with clean, reliable backup power. Pair PWRcell 2 with a PWRmicro Solar Microinverter for even more power, greater savings and reliability. Produce, store, and manage your own energy, reducing reliance on an unstable grid.

We are KEBE, a professional lithium battery manufacturer in China for 20 years. We're provider of solutions for household energy storage systems, industrial and commercial energy storage systems and other energy storage systems. We're integrates the R&D, production and sales of lithium battery.

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can then use your stored energy to power the devices and appliances in your home day and night, during outages or when you want to go off-

grid. With customizable power modes, you can optimize your stored.
