

# New Zealand solar container lithium battery pack customization

## Overview

---

What makes NZ a good battery company?

NZ-Built Quality: Expertly designed and assembled locally for superior reliability and performance. Advanced Technology: Utilizing the latest in lithium cell and BMS technology. Affordable Energy: Delivering high energy density solutions at competitive prices. Custom Solutions: Tailored battery systems to meet your specific needs.

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Where can I rely on a containerised energy storage solution?

Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries).

What is containerised battery storage?

A long-term solution: our containerised battery storage solutions are built to last for decades. Your system's precious lithium-ion core is housed in an incredibly tough shipping-grade container. Battery storage from solar panels, wind turbines or water sources can give you the independence you need.

## New Zealand solar container lithium battery pack customization

### Kissolutions - Battery Building and EV Technology Specialist

Kiss Solutions can help you with customized lithium batteries and systems. Kiss uses the newest practical methods to provide Clean Energy for both commercial and individual clients.
