

Norway Bergen Mobile Power Station Generator Set

Overview

What is a Bergen generator?

Bergen engines provide reliable, responsive and high-performance power solutions for any operational mode. Bergen generator sets offer a wide range of power solutions from baseload, variable load, peaking, grid support and emergency power, to combined heat and power (CHP) and hybrid solutions with renewable energy sources.

Where is Bergen Generating Station?

Bergen Generating Station is a gas-fired power plant owned and operated by Public Service Electric and Gas Company (PSE&G). It is located on the banks of Overpeck Creek near its confluence with the Hackensack River in Ridgefield in Bergen County, New Jersey, United States.

Does Bergen Engines support hybrid-renewable microgrid solutions?

As wind or solar renewable power supply can fluctuate dramatically throughout a given period, Bergen Engines supports hybrid-renewable microgrid solutions with fast start reciprocating engines to enhance the reliability and stability of the microgrid.

Norway Bergen Mobile Power Station Generator Set

The Power of 10: Modular 10MW units that scale to 100MW+ for ...

The Bergen generator has been successfully paired with a Marelli Motori alternator and combined with the Piller 10MW choke, with 4 2.5MW Piller power conditioning modules ...
