The first utility scale energy storage system in the Ottawa area. CIMA+ was hired by PCL Constructors Canada Inc. as a consultant for their client Canadian Solar Solutions Inc. as they completed the design and construction of the Battery Energy Storage System (BESS). The project, delivered in EPC.

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge.

Remarkably, the first solar panels were developed by the Bell Laboratory, founded by Ottawa native Alexander Graham Bell. Ottawa Name explores the history and innovations behind solar energy in the Canadian capital. Many Ottawans might believe solar panels are a modern invention. However, their.

The battery storage project alongside the six solar projects Council supported earlier this fall will reduce the city's reliance on expensive gas-fired electricity during peak demand and strengthen Ottawa's ability to meet its climate and energy commitments. "This is Ottawa's largest-ever battery.

CanmetENERGY-Ottawa's research and development (R&D) program in this domain integrates our research on renewable energy sources, including wind, solar, marine and geothermal, with our research on electrification, storage and transportation, to maximize synergies, address systems-level issues, such.

A city committee passed new regulations Thursday that lay out the ground rules

for companies looking to build battery energy storage facilities in Ottawa, but residents are split on whether the new rules go too far — or not far enough. Evolgen, a renewable energy company based in Gatineau, Que.
