

Outdoor intelligent networking base station

Overview

This product is based on the advanced multi-core ARM and FPGA scheme, and adopts the integrated design of 5G BBU and RRU to realize the complete 5G NR wireless access network function, which can quickly and quickly establish a 5G wireless network with large bandwidth, low delay and.

This product is based on the advanced multi-core ARM and FPGA scheme, and adopts the integrated design of 5G BBU and RRU to realize the complete 5G NR wireless access network function, which can quickly and quickly establish a 5G wireless network with large bandwidth, low delay and.

TP-LINK's 5GHz 300Mbps * Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point.

Built for the toughest environments, the MultiTech Conduit® IP67 Base Station delivers secure, reliable LoRaWAN® connectivity for outdoor and industrial IoT deployments. Now, every unit ships with an industry-leading 5-year manufacturer's warranty, providing unmatched peace of mind and long-term.

LNK-AP80 is an Qualcomm Solution 11ac high power industrial use Outdoor CPE with the next generation 802.11ac Wi-Fi standard, combined 1200Mbps Wi-Fi speed over 2.4GHz (300Mbps) and 5GHz (900Mbps), equipped Gigabit WAN port, fast Ethernet data rate make more than 100 end users can access into it to.

This product is based on the advanced multi-core ARM and FPGA scheme, and adopts the integrated design of 5G BBU and RRU to realize the complete 5G NR wireless access network function, which can quickly and quickly establish a 5G wireless network with large bandwidth, low delay and high reliability.

Outdoor LTE base station with dual-carrier support and built-in high-gain omni antennas for private network deployments in Bands 40 and 48. This product is designated an Industrial-class booster by the FCC and may only be sold as part of a custom-designed solution. Please contact us by calling.

As 5G micro-base stations extend from cities to suburbs, rural areas, highways,

wind and solar power stations, and even islands, these locations lack machine rooms, personnel, and have harsh environments. Traditional power solutions expose issues such as space occupation, complex interfaces, poor.
