

# Paris solar container battery

## Overview

---

This project is proposed by an independent power producer, Paris Solar Farm, LLC, a wholly owned subsidiary of Invenergy LLC. As such, the need for the project is not reviewed by the Commission.

What is Paris Solar-Battery Park?

The 110-megawatt (MW) battery portion of the Paris Solar-Battery Park went online this month. The 200-MW solar portion of the project went into service in December. The storage facility is made up of batteries capable of powering more than 130,000 homes for four hours.

How many batteries does Paris solar park have?

The park's 12,000 lithium-ion batteries can power over 130,000 homes for up to four hours. We Energies, the majority owner, plans to discharge the batteries multiple times per week. The accompanying Paris Solar Park, with nearly 50,000 solar panels, provides the energy stored in the batteries.

Will Paris solar sell the project?

Paris Solar has stated that they intend to either; sell the electrical output of the project to customers pursuant to one or more agreements, or alternatively, they will sell some or all of the project to one or more Wisconsin public utilities, with Paris Solar remaining as the builder and operator of the project.
