

# Peruvian multicrystalline solar module glass

## Overview

---

Are PV glass modules a good solution for energy efficient buildings?

These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings. It provides glazing design options and endless possibilities for BIPV designers and architects to implement one of a kind exterior solutions.

What is a PV glass module?

This technology so far has the highest durability rate against harsh environmental conditions and longer lifespan compared to other building integrated photovoltaics solutions in the market. These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings.

What are Targray's high-efficiency multicrystalline solar modules?

Targray's portfolio of high-efficiency multicrystalline solar modules is built to provide EPCs, installers, contractors and solar PV developers with reliable, cost-effective material options for their commercial and utility-scale solar energy projects.

What is a crystalline silicon PV module?

The majority of today's crystalline silicon (c-Si) PV modules are manufactured in accordance with a glass-backsheet (GBS) module lay-up: 3.2-4mm glass at the front and a polymer-based insulating backsheet (Fig. 1(a)). An aluminium frame is applied around the module to increase mechanical stability.
