A working understanding of contract development best practices and access to standardized solar contract templates and request for proposals (RFPs) will help reduce the time and cost associated with this process by improving project transparency and accountability while accelerating solar.

Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic (PV) systems. These resources were developed by an NLR-led working group—convened from the solar, finance, and legal.

International Renewable Energy Agency (IRENA) and Terrawatt Initiative (TWI) have teamed up to support the rapid and widespread scale-up of solar energy in line with goals of the Paris Climate Agreement and Sustainable Development Goals. Open Solar Contracts streamlines project development and.

Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector.¹ Under an EPC Contract, a Contractor is obliged to deliver a complete facility to the Project Company. The Project Company needs only to turn a key to start.
