

Polysilicon and price of solar panels

Overview

From upstream polysilicon, wafers and cells, to downstream panel prices, OPIS Global Solar Markets keeps you updated on solar price trends and forward prices.

From upstream polysilicon, wafers and cells, to downstream panel prices, OPIS Global Solar Markets keeps you updated on solar price trends and forward prices.

*Notice: Starting January 2026, prices for TOPCon high-efficiency modules (640W and above) will be newly included in weekly price updates. Polysilicon No transactions have been concluded at new InfoLink's polysilicon price quotes exclude additional costs from special specifications or requirements.

This week, the mainstream concluded price for mono recharge polysilicon is RMB 36.5/KG, while mono dense polysilicon is priced at RMB 34.0/KG and N-type polysilicon is currently priced at RMB 33.0/KG. Orders have gradually been signed post-holiday, and transaction volumes have expanded slightly.

From upstream polysilicon, wafers and cells, to downstream panel prices, OPIS Global Solar Markets keeps you updated on solar price trends and forward prices. It is the first solar materials price report to use an assessment methodology that follows IOSCO requirements for fair and transparent.

[SMM Silicon-Based PV Morning Meeting Minutes] Polysilicon: The quoted price for polysilicon N-type recharging polysilicon is 50-55 yuan/kg, granular polysilicon is quoted at 49-51 yuan/kg, and the polysilicon price index stands at 52.35 yuan/kg. Following the emergence of previous high market. How much does polysilicon cost?

Polysilicon While a preliminary framework for polysilicon man InfoLink's polysilicon price quotes exclude additional costs from special specifications or requirements (e.g., traceability documentation). Currently, non-Xinjiang polysilicon with traceability data generally carries a quoted premium of RMB 3-5/kg.

How much did polysilicon cost in 2004?

Due to the strong demand and the higher polysilicon costs, the average module price increased to \$3.35/W in 2004. With a specific silicon consumption of 13 g/W

and an annual spot price average of \$43/kg, the share of the higher polysilicon costs (\$0.56/W) in the module price (\$3.35/W) rose only slightly to 16.7 % in 2004.

How much did polysilicon cost in Q2 2025?

From global manufacturers to government agencies, our clients rely on us for accurate pricing, deep market intelligence, and forward-looking insights. In Q2 2025, the polysilicon prices in the USA reached US\$ 30 per metric ton in June. Explore live polysilicon price trend, index, and chart with forecasts.

How much does non Xinjiang polysilicon cost?

Currently, non-Xinjiang polysilicon with traceability data generally carries a quoted premium of RMB 3–5/kg. Polysilicon prices in dollar terms are prices for polysilicon with non-China origins in dollar terms, not translated from RMB prices.
