

# Power battery pack front and back

## Overview

---

What is a battery pack?

Battery packs, also known as power banks or portable chargers, provide the extra juice needed to keep our devices running when power outlets are out of reach. Imagine you're on a long hike, capturing stunning photos with your camera, or using your GPS to navigate. Suddenly, your device's battery is running low, and there's no outlet in sight.

What is the best battery pack for backpacking?

To top things off, the Baseus Picogo has a retractable USB-C cable for faster charging, as well as a USB-C port. If you're going backpacking and you need a battery pack that can take a little bit of punishment, we like Nestout's rugged power bank.

Do you need a portable battery pack?

If you own a mobile phone, tablet, or any USB-powered device, the chances are strong that you need a portable battery pack. They work like extra batteries; you simply plug in your device when it needs a charge. Power banks are a useful accessory to have if you're traveling or constantly on the go.

What makes a good battery pack?

Some battery packs come with built-in cables, stands, or informative displays that show charging status and battery levels. Others might offer app connectivity for locating the power bank or optimizing charging performance. These extra features can add significant value and convenience.
