

# Price of a wind-solar hybrid system

## Overview

---

How much does a hybrid solar system cost?

These factors are influenced by your unique situation. The wind solar hybrid system price can vary from \$7,000 to \$12,000 after government, state, and utility company incentives, and depending on your power output requirements will determine which off-grid solar and wind power kits would be better for your home.

2.

Should you buy a solar wind hybrid system?

A single battery storage system can be used for both power sources rather than purchasing a separate one to reduce start-up costs. Buying a solar system and a wind turbine separately can be expensive. Combining the two reduces the purchasing price considerably. A solar wind hybrid system is environmentally friendly.

What is hybrid solar wind?

With hybrid solar wind systems the consistent power generation is maximized, with the sun shining during the day and the wind blowing at night. This advantage is highlighted even further with the change of seasons, and the industry is expanding its reach to cover residential, commercial, and industrial premises alike.

How much does a wind-solar hybrid system cost?

If we consider the prices of all the components of a wind-solar hybrid system to meet the average energy requirement (30kWh per day) of a US home, then we will need:

Solar panels: The cost of solar panels can range from \$0.60 to \$1.40 per watt. For an average home that requires 30 kWh of power per day, a 6 kW solar panel system would be required.
