An uninterruptible power supply (UPS) is a crucial device that ensures your computer and other electronic devices continue to operate for a short period of time even when the primary power source is lost. It also provides protection from power surges. The UPS system works by converting incoming AC.

Discover a range of reliable and efficient uninterruptible power supplies (UPS) at our online shopping website. Keep your electronic devices protected from power outages and voltage fluctuations with our selection of UPS systems. Whether you need backup power for your home office, gaming setup, or.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that provides backup power to electronic devices in the event of a power outage. It ensures uninterrupted power supply, preventing data loss and damage to sensitive components. How does a UPS work?

A.
