Solar energy plays a significant role in the federal government's strategy for renewable and efficient energy. Because solar systems produce energy on site, they involve unique issues and processes. They include connecting the solar system to both an electrical system and building, understanding.

A Request for Proposal (RFP) is a formal bid document to ask vendors to provide proposals for desired projects, as required by many public agencies (federal, state, local). A solar RFP outlines the photovoltaic (PV) product or service requirements, the contract terms, and bidding process. RFPs are.

Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic (PV) systems. These resources were developed by an NLR-led working group—convened from the solar, finance, and legal.
