

Recommended sources of rechargeable energy storage batteries in Croatia

Overview

Zagreb, 8 July 2025 – Renewable Energy Sources of Croatia (RES Croatia) and the European Bank for Reconstruction and Development (EBRD) are collaborating on the development of an expert study titled “ Identification of Congestion Locations in the Electricity Grid and.

Zagreb, 8 July 2025 – Renewable Energy Sources of Croatia (RES Croatia) and the European Bank for Reconstruction and Development (EBRD) are collaborating on the development of an expert study titled “ Identification of Congestion Locations in the Electricity Grid and.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

The company specializes in a variety of starter batteries, including lead-acid and LiFePO4 technologies, and highlights the importance of maintaining battery charge during storage to extend lifespan. With over 50 years of R&D experience, their products are known for longevity and durability, making.

Zagreb, 8 July 2025 – Renewable Energy Sources of Croatia (RES Croatia) and the European Bank for Reconstruction and Development (EBRD) are collaborating on the development of an expert study titled “ Identification of Congestion Locations in the Electricity Grid and Battery Energy Storage Needs in.

n Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially extendable to 110 MW by 2025 for a series of grid-connected projects. The aid will be a direct grant to IE-Energy and will cover approximately 30% of.

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Šibenik. This initiative is spearheaded by IE-Energy Projekt, with the EBRD investing €16.8 million, complemented by matching funds from Raiffeisen.

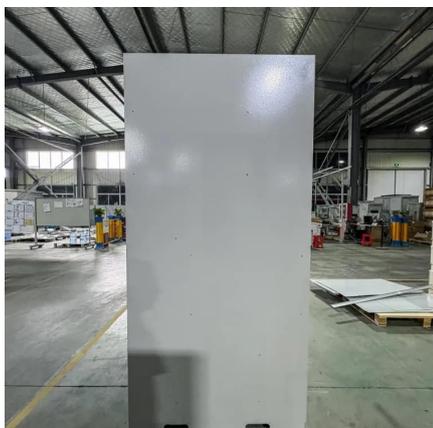

The Croatian government has prepared 500 million euros to install batteries for

storing energy produced from renewable sources. Minister of Economy and Sustainable Development Damir Habijan stated that Croatia is ready for energy changes. As he pointed out, we should take care of the green.
