

Resort uses Ottawa solar-powered containers for fast charging

Overview

XCharge North America, a provider of high-power EV charging and battery-integrated solutions designed to strengthen the North American electrical grid, announced a new partnership with Wildhorse Resort & Casino's Arrowhead Travel Plaza to deploy four, dual-dispenser GridLink chargers.

XCharge North America, a provider of high-power EV charging and battery-integrated solutions designed to strengthen the North American electrical grid, announced a new partnership with Wildhorse Resort & Casino's Arrowhead Travel Plaza to deploy four, dual-dispenser GridLink chargers.

Solar-powered charging for resorts refers to the use of solar energy to power various charging stations and amenities within resort properties. This includes charging stations for electronic devices such as smartphones, laptops, and cameras, as well as other energy-consuming equipment like pool.

KYLE, Texas-- (BUSINESS WIRE)--XCharge North America ("XCharge NA"), the North American subsidiary of XCHG Limited (Nasdaq: XCH) ("XCharge") and a provider of high-power EV charging and battery-integrated solutions designed to strengthen the North American electrical grid, announced a new.

One key area of advancement is in charging technology itself. Rapid charging solutions, such as fast chargers and ultra-fast chargers, are expected to become more prevalent, allowing EV owners to recharge their vehicles in a fraction of the time compared to traditional charging methods.

XCharge North America, a provider of high-power EV charging and battery-integrated solutions designed to strengthen the North American electrical grid, announced a new partnership with Wildhorse Resort & Casino's Arrowhead Travel Plaza to deploy four, dual-dispenser GridLink chargers, providing.

XCharge North America has launched Oregon's first solar-plus-storage DC fast-charging station at Wildhorse Resort & Casino's Arrowhead Travel Plaza. The four dual-dispenser GridLink chargers provide fast, efficient, and reliable charging for EVs. The installation integrates 40kW of solar and 215kW.

Solar-powered charging for resorts refers to the use of solar energy to power

various charging stations that cater to the needs of guests, including mobile devices, laptops, and other electronic gadgets. By harnessing the sun's energy, resorts can significantly reduce their reliance on traditional.
