

# Romania Energy Storage Peaking Power Station Subsidy

## Overview

---

Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday.

Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday.

On 17 September 2024, the Ministry of Energy of Romania launched a State aid scheme to support investments in the development of electricity storage capacities. The scheme aims to finance the establishment of storage capacities connected to renewable energy sources, including hydroelectric power.

Romania's Ministry of Energy announced it cleared the disbursement of grants under the Resilience Facility in the total amount of nearly EUR 36 million for five power storage projects with a combined capacity of over 790MWh. Among the recipients, there are investment vehicles of "a Dutch.

in the electricity sector. The EU's strategy for energy system integration lays out the groundwork for how an increasingly electrified economy increase in storage capacity. As part of the Clean Energy Package, the Electricity Directive and Regulation that are the basis for a revamped EU electricity.

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage.

The Romanian Ministry of Energy has announced a new round of funding from the

Modernization Fund dedicated to battery energy storage systems. Romania has launched a new non-refundable funding program for battery energy storage systems to the tune of EUR 150 million (\$158 million), this time.

## Romania Energy Storage Peaking Power Station Subsidy

### Romania allocates EUR 150 million for standalone battery storage

The objective of the scheme is to support investments in the development of battery energy storage systems which can be used to store renewable energy (solar, wind and ...
