

# Romania Solar Containerized Low-Pressure Type Procurement Contract

## Overview

---

As part of its EU commitment to promote decarbonisation and the development of low-carbon energy sources with a focus on renewable energy, Romania passed a legislative package containing a two-way Contracts for Difference (CfD) support mechanism, leading to the announcement of the.

As part of its EU commitment to promote decarbonisation and the development of low-carbon energy sources with a focus on renewable energy, Romania passed a legislative package containing a two-way Contracts for Difference (CfD) support mechanism, leading to the announcement of the.

le energy projects. The 1st round, for 0.5 GW solar capacity and 1 GW onshore wind, is scheduled for late 2024, with a further 3.5 GW scheduled for 2025 as part of a plan to award CfDs for a total of 10 GW of onshore wind and solar-PV generati .

Polish IPP R.Power has been awarded 85MW of solar PV capacity in Romania's first CfD. Image: R.Power. Romania's Ministry of Energy's has awarded 432MW of solar PV capacity across 11 projects in its first Contracts for Difference (CfD) scheme. The CfD ended up more than three times oversubscribed.

As part of its EU commitment to promote decarbonisation and the development of low-carbon energy sources with a focus on renewable energy, Romania passed a legislative package containing a two-way Contracts for Difference (CfD) support mechanism, leading to the announcement of the first auction for.

Wind and solar power projects with a combined capacity over 1.5 GW in Romania are eligible for subsidies under a contract-for-difference (CfD) scheme. The first round of auctions resulted with ten and eleven winning bids, respectively. The weighted average of accepted wind power prices is EUR 65.

Supported by the EBRD, Romania has this week launched a Contract for Difference (CfD) mechanism for the construction of renewable energy installations and opened the first auction for 1.5 GW of renewable energy generation capacities - 500 MW of solar PV and 1 GW of onshore wind. This is the next.

As Romania accelerates its renewable journey in 2025, the landscape of energy

procurement is undergoing a bold transformation. Driven by the dual pillars of CfDs and PPAs, the country is cementing the foundation for market-driven clean energy deployment – at scale and with confidence. With clear. How much does solar cost in Romania?

Romania has opened its second renewables auction under a contracts-for-difference (CfD) scheme, offering 3.47 GW of capacity, including 1.47 GW of solar. The auction sets a maximum strike price of €73 (\$81.81)/MWh for solar energy. Romania's Ministry of Energy has announced its second renewables auction under a CfD scheme.

Are wind and solar power projects eligible for subsidies in Romania?

Wind and solar power projects with a combined capacity over 1.5 GW in Romania are eligible for subsidies under a contract-for-difference (CfD) scheme. The first round of auctions resulted with ten and eleven winning bids, respectively.

Are wind and solar power projects eligible for contracts for Difference (CfD)?

Be the first one to comment on this article. Wind and solar power projects in Romania of over 1.5 GW in total are eligible for contracts for difference (CfD) after the first auctions.

How much does wind power cost in Romania?

The weighted average of accepted wind power prices is EUR 65 per MWh, compared to EUR 51 per MWh for photovoltaics. Officials in Romania are hoping that the EUR 3 billion approved from the European Union's Modernisation Fund will cover the costs of the new 15-year CfD mechanism for solar and wind power.
