Russia patents space station design

that could create gravity

Instead of accepting permanent weightlessness as a given, Russian engineers are sketching out a station that spins to create artificial gravity, potentially reshaping how crews live, work,

Russia plans anti-gravity space station as ISS nears end of its life

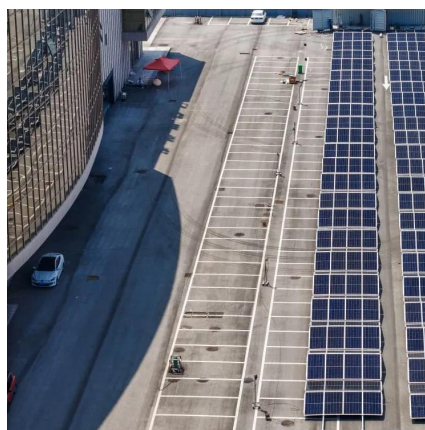

Metlen completes sale of 1.6GWh Chile solar-plus-storage portfolio to Glenfarne Group MERCURIA ENERGY TRADING SECURES OFFTAKE AGREEMENT WITH ...

[Request Quote](#)

[Russia plans artificial gravity space station](#)

Russia has patented a space station that spins to create gravity to allow astronauts to live and work without floating.

[Request Quote](#)

Russia's Space Station Patent Could Make Artificial Gravity a ...

Russia's Energia rocket company has patented a revolutionary space station design that could produce artificial gravity. As the possibility of long-duration space exploration ...

Russia patents space station with

artificial gravity as ISS era ends

Russia's design aims to provide a permanent solution by simulating 0.5g, or half (50 percent) of Earth's gravity. The patent describes a massive, modular rotating structure that ...
