ectrical energy in many parts of the world today. Air-conditioning systems in use are most often built around a va or compression system driven by grid-electricity. However, most ways of generating the electricity today, as well as the refrigerants being used in traditional vapor compression.

For years, Rwanda has been paving a path to green growth by integrating action on climate and clean air into their development agenda. Since 2016, they've done this work in partnership with the Climate and Clean Air Coalition (CCAC), standing out as a leader that is tackling short-lived climate.

As Rwanda builds for the future, smart air conditioning solutions are key to keeping schools, hospitals, and offices comfortable and efficient. We are proud to supercharge Rwanda's rapid national growth in core industries. eco° HVAC solutions for Rwanda focus on smart and highly efficient COOLING.

From residential rooftops to large-scale commercial installations, we deliver reliable off-grid and on-grid solar systems that reduce costs and carbon footprint. Innovative smart and green real estate development in Rwanda. We design and construct eco-friendly buildings with integrated renewable.

TechEmerge partnered with the Africa Centre of Excellence for Sustainable Cooling and Cold-Chains (ACES) in Rwanda, to test, develop, and demonstrate sustainable cooling solutions, particularly for health and agriculture. TechEmerge provided grant funding for innovators to ship their technology to.
