The Asian Development Bank (ADB) has provided a USD-2.8-million loan to Sun Pacific Energy Ltd (SPEL) to upgrade an existing solar farm in Samoa by replacing older solar panels, increasing renewable generation in the Pacific nation. Samoa solar project. Image: Asian Development Bank ().

ADB and Sun Pacific Energy Ltd signed a \$2.8 million loan to expand Samoa's Upolu Solar Farm with high-efficiency panels, backed by ACFP technical assistance. Link copied! Copy failed! Upolu Solar Farm expansion by ADB and SPEL added high-efficiency panels and addressed Samoa's peak power demand.

A growing share of decommissioned PV modules will be glass-glass PV modules, these modules are different from regular glass-back sheet (GBS) modules and replace the traditional polymer back sheet with a glass layer identical to the top glass layer. Glass-glass PV modules currently account for about.

The Asian Development Bank (ADB) and Sun Pacific Energy Ltd (SPEL) have signed a \$2.8 million (approximately AU\$4.3 million) loan to expand renewable energy generation in Samoa. The financing will support the upgrade and expansion of SPEL's Upolu Solar Farm, originally partly funded by ADB in 2017.

For the past seven years, the island's 600 residents have relied on Tesla batteries and solar panels instead of diesel generators - a rare Pacific success story in renewable energy. Now, just a short flight away, Western Samoa is trying to catch up. The country has signed off on a multi-million.
