

Samoa solar container communication station power outage

Overview

Samoa's power supply issues continue as the Electric Power Corporation (EPC) announces ongoing outages and power rationing measures. In a public advisory issued on 14 March 2025, EPC stated that the outages will persist due to essential infrastructure repairs and maintenance.

Samoa's power supply issues continue as the Electric Power Corporation (EPC) announces ongoing outages and power rationing measures. In a public advisory issued on 14 March 2025, EPC stated that the outages will persist due to essential infrastructure repairs and maintenance.

The public will continue to experience frequent power outages in the coming days as the Electric Power Corporation (EPC) works to address key challenges within Samoa's power infrastructure. In a statement issued on Saturday, the EPC assured the public that it is actively addressing issues that have.

Samoa, or the Samoan Islands, is an archipelago in Polynesia, with a population of less than 220,000. In recent weeks, it has fallen into an energy crisis, with the country's Prime Minister Fiame Naomi Mata'afa declaring a 30-day state of emergency at the beginning of April due to continued power.

It has been observed that our nation has been significantly affected by frequent power outages, particularly impacting households, businesses, and the various villages in Upolu. I wish to inform that the Corporation continues to work diligently and urgently to address all issues, aiming to resolve.

[PRESS RELEASE April 7, 2025] - The Government of Samoa has declared a 30-day State of Emergency in response to the ongoing energy crisis. The Electric Power Corporation (EPC) and the National Emergency Operations Centre (NEOC) are working closely to ensure the continuity of essential services and.

EPC workers carry out repairs on critical power infrastructure as Samoa continues to experience widespread outages.
