

San Jose exports solar panels to Bai

Overview

U.S. trade officials finalized steep tariff levels on most solar cells from Southeast Asia, a key step toward wrapping up a year-old trade case in which American manufacturers accused Chinese companies of flooding the market with unfairly cheap goods.

U.S. trade officials finalized steep tariff levels on most solar cells from Southeast Asia, a key step toward wrapping up a year-old trade case in which American manufacturers accused Chinese companies of flooding the market with unfairly cheap goods.

Chinese solar panel manufacturers have a strategy for circumventing U.S. trade restrictions, responding to new tariffs by relocating production facilities to countries less affected by American policies. This shift has impacted the solar industry in Southeast Asia, following the U.S. Commerce.

Large solar panels are seen in a solar power plant in Hami, China on May 8, 2013. U.S. trade officials finalized steep tariff levels on most solar cells from Southeast Asia, a key step toward wrapping up a year-old trade case in which American manufacturers accused Chinese companies of flooding the.
