uilding in Houston. By coupling a proprietary digitally-designed and fabricated solar rack for power production with a standard shipping container transformed into a customized interior office, the concep daptable workspace. In 2011, SPACE was tapped by the City of Houston to provide mobile solar.

As college graduation loomed, Jess Elena and Jake Gomez found themselves at a crossroads. Since meeting while working at an ice cream parlor in South Florida, the couple had been steadily saving money, motivated by a shared love of travel and a desire to avoid the traditional 9-to-5 path. What they.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from.

Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean development for applications ranging from European building sites to African communities and the rest of the globe. Essentially.
