

Seoul Solar Container 40kWh

Overview

How much solar power does Seoul have?

By the end of 2018, 98 MW of solar capacity was installed on public buildings, with a goal of 244 MW by 2022. Seoul is the first city in South Korea to develop standards in an ordinance on rents of municipal sites to private solar power generators.

How can solar power be used in Seoul?

Seoul is also finding innovative ways to increase solar capacity, such as renting unused municipal land to private power generators and cooperatives for larger-scale PV power generation. Seoul has also made installation of solar PV systems mandatory for public buildings through the Seoul Environmental Assessment Standards and Green Building Code.

How much solar power will Seoul have by 2022?

Seoul's metropolitan government plans to deploy 1 GW of solar photovoltaic power for residential and municipal buildings. By 2022, every public building and one million homes in the city are set to be solar-powered, thanks to the Solar City Seoul project.

Does Seoul have a solar PV system?

Seoul has also made installation of solar PV systems mandatory for public buildings through the Seoul Environmental Assessment Standards and Green Building Code. From schools to parking lots, Seoul is working with every division related to municipal infrastructure to install solar PV systems on all available municipal sites.
