

Seoul crystalline silicon solar module price

Overview

Current distributed Topcon 183, 210R, and 210N high-efficiency modules are quoted at 0.668 Yuan/W, 0.681 Yuan/W, and 0.674 Yuan/W, respectively, while centralized Topcon 182/183 and 210N high-efficiency modules are quoted at 0.67 Yuan/W and 0.69 Yuan/W, respectively.

Current distributed Topcon 183, 210R, and 210N high-efficiency modules are quoted at 0.668 Yuan/W, 0.681 Yuan/W, and 0.674 Yuan/W, respectively, while centralized Topcon 182/183 and 210N high-efficiency modules are quoted at 0.67 Yuan/W and 0.69 Yuan/W, respectively.

After a brief pause during the SNEC 2025 week, TaiyangNews returns with the latest PV Price Index, highlighting a largely positive week for upstream players in Calendar Week 25. Chinese polysilicon prices posted week-on-week (WoW) gains across the board, with increases ranging from 2.8% for n-type.

*Notice: Starting January 2026, prices for TOPCon high-efficiency modules (640W and above) will be newly included in weekly price updates. Polysilicon No transactions have been concluded at new InfoLink's polysilicon price quotes exclude additional costs from special specifications or requirements.

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange. For the fourth year, the price index findings shed light on the importance of a.

[SMM Silicon-Based PV Morning Meeting Minutes] Polysilicon: The quoted price for polysilicon N-type recharging polysilicon is 50-55 yuan/kg, granular polysilicon is quoted at 49-51 yuan/kg, and the polysilicon price index stands at 52.35 yuan/kg. Following the emergence of previous high market.

This week, module prices remained unchanged. For utility-scale projects, TOPCon 210 bifacial modules averaged RMB 0.640/W, TOPCon rectangular bifacial modules averaged RMB 0.640/W, and HJT rectangular bifacial modules averaged RMB 0.715/W. Demand: The domestic distributed market remained sluggish.

Poly-Crystalline (or) Multi-Crystalline Silicon PV is expected to dominate the

market, owing to its low cost and higher space efficiency as compared to mono-crystalline PV. Technological advancements in the field of solar cells to increase efficiency and rise in government spending on renewable.
