Circuit breakers, also known as residual current breakers, are designed to protect your home and family from electrical hazards. They automatically cut off electricity when an abnormal condition occurs, such as a short circuit, overload, or electric leakage. If your breaker trips frequently, it may.

We offer a range of solutions, including the 70ab Float Switch, Indoor Distribution Boxes, Main Breaker, and Lithium Ferro Phosphate Battery. Our products are exported to multiple countries, including Europe, America, and Australia. We pride ourselves on meeting national accreditation standards.

A circuit breaker is an electrical device designed to protect electrical circuits from damage caused by overcurrent, short circuit, or other electrical faults. It functions as a switch that automatically interrupts electrical flow when it detects an abnormal condition in the circuit, such as an.
