

Slovenia Communications 5g base station room

Overview

Does Slovenia have broadband coverage in 2024?

This study is a data-driven look at broadband coverage in 2024 and progress towards the Digital Decade targets. Slovenia opts for technological neutrality and market dynamics in developing digital connectivity networks, in particular infrastructure and service-based competition.

Is 5G available for industrial purposes?

Yes. Certain operators started to introduce special 5G services aimed at the most active users. 3. Has 5G been launched for industrial purposes?

For which sectors?

The authorities have granted a 700MHz licence to support business-critical machine-to-machine (M2M), so projects such as smart factories are now in the testing phase. 4.

What are the legislative and regulatory measures being implemented in Slovenia?

Legislative and regulatory measures are being implemented to promote and ensure both competition and the timely achievement of the desired goals concerning the expansion of Slovenia's digital connectivity networks. They aim to improve regulatory predictability and removing barriers to investment, making Slovenia more attractive to investors.

When did 5G start?

Operators introduced 5G services at the end of 2020 and beginning of 2021. 5G household coverage is 36.6%, and 2.8% in rural areas. 2. Are telecoms companies monetising 5G investments - or are the services provided to consumers at similar prices to 4G?

Yes. Certain operators started to introduce special 5G services aimed at the most active users.
